Toyota camry hybrid 2020 specs

There have been five generations of the RAV4 released by Toyota, with RAV 4 specifications slightly different with each incarnation of this popular crossover vehicle, according to MotorTrend. The RAV4 concept was presented in 1986 at the Tokyo Motor Show, but it didn’t go into production for a few years.First Generation RAV4The first generation of the RAV4 hit the American market in 1996, though it was released two years earlier in Japan and Europe. First generation Rav 4 vehicles were available as a four-speed automatic or five-speed manual, and a two-liter, four-cylinder gas engine delivered 120 horsepower. The bodies featured either two doors or four doors, and an all-electric model was released in 1997 on the first-generation platform. The horsepower of the RAV 4 was increased to 127 hp in 1998.Second Generation RAV4The second generation of the RAV 4 was released in 2001, and it had increased power that translated to higher RAV 4 towing capacity and enhanced performance. Still sporting a two-liter, four-cylinder engine, the punched up second generation RAV 4 delivered 148 horsepower and 140 foot-pounds of torque. The four-speed automatic was able to go from zero to 60 mph in 10.4 seconds and the five-speed manual could do it 8.9 seconds. For the 2004 models, in the later part of the second generation for the RAV 4, the horsepower was increased again, this time to 161 hp.Third Generation RAV4The third generation of the RAV 4 began in 2006, and it included a six-cylinder, 3.5-liter engine that delivered 269 horsepower. It was also 14 inches longer than the first- and second-generation models. Third-row seating was an option, but it didn’t leave much leg room for tall passengers. An electric version of the RAV 4 was also offered at the end of the third generation.Fourth Generation RAV4The RAV 4 dimensions were scaled down for the fourth-generation models, which were released in 2012. Most of the third-generation upgrades were removed to make the RAV 4 more competitive with the Honda CRV and the Ford Escape, according to MotorTrend. Third-row seating was no longer available, and the six-cylinder option was gone. The fourth-generation models were two inches shorter in length, two inches shorter in height and a touch wider.Fifth Generation RAV4The fifth-generation RAV 4 made its first public appearance in March 2018, according to MotorTrend. A new trim package was integrated into the fifth generation of the RAV 4, according to AutoTrader. The RAV 4 Trail came with all-wheel drive (AWD) as part of the standard package, and its 2.5-liter four-cylinder engine delivers 176 horsepower.
